Email: [souzabibiana@hotmail.com](mailto:souzabibiana@hotmail.com)

LinkedIn: [/bibiana-souza](#)

GitHub: [/bibschan](#)

## PROFILE

Dynamic and creative Full Stack Developer with a history of building robust web applications. Coming from a Project Management background, I am devoted to writing high quality documentation and keeping things organized.

## SKILLS

Frontend: HTML5, CSS, JavaScript, React, DOM APIs, Axios, Web APIs

Backend: MySQL, PostgreSQL, Node, Sequelize, Express

Testing: Jest

## EXPERIENCE

---

### Project Coordinator | Fully Managed

NOV 2017 – SEP 2020, VANCOUVER, BC

- Supervised a team of technicians to design and implement a variety of IT solutions for over 20 global clients, such as cloud infrastructure and email migrations
- Managed several concurrent projects ensuring completion in a timely manner
- Worked as a Procurement Specialist in charge of purchasing hardware and software for 100+ clients

## EDUCATION

---

### BrainStation | Diploma in Web Development

SEP - DEC 2020, VANCOUVER, BC

### BCIT | Certificate in Applied Web Development

JAN - DEC 2017, VANCOUVER, BC

Graduated with Distinction

## PROJECTS

---

### Whatch ([link](#)) | Creator

DEC 2020, BRAINSTATION CAPSTONE PROJECT

Designed and created a responsive application that allows friends to create groups and swipe right or left on series/movies of their liking, similar to Tinder but for entertainment. Stack used **React, Express, Sequelize, PostgreSQL and Axios**.

### 1<sup>st</sup> place at Walmart Hackathon ([link](#)) | Coder

DEC 2020, WALMART x BRAINSTATION 24-HOURS HACKATHON

Prototyped an app with 7 teammates to facilitate Walmart customers to split the delivery cost of their online groceries with their close neighbors. Stack used **React and SCSS**.

### Chatr ([link to backend](#) / [link to frontend](#)) | Creator

MAY 2020 – PRESENT, PERSONAL PROJECT

Presently working on creating a web application that allows users to join forums of their interest and connect via video. Stack used **Javascript, Express, Sequelize, PostgreSQL and Axios**.
