PROFILE

I am a Software Engineer with a background in Mechanical Engineering. While working on my Ph.D., I realized that I needed to pivot my career into tech, which is my childhood passion since I saw my software engineer brother taking a website's template by opening Chrome DevTools and acting like he hacked the website. I took the risk and decided to invest in my education with Brainstation. Now, I enjoy my life while working.

SKILLS

HTML, CSS, JavaScript, Node.js, React.js, Express, MySQL, Knex.js, Agile Development, Document Object Model (DOM) APIs, Web APIs, User Authentication, OAuth, Heroku, GitHub, Jest, Slack.

EXPERIENCE

Research Project Student | Sherbrooke University

JAN 2022 - 2023, Sherbrooke, QC

- Carried presentation skills to the top-end by presenting project details to the sector professionals.
- Learned to work in a team with weekly meetings.
- Started a coding journey and gained hands-on experience with Arduino.

Research Assistant | Karabuk University

JAN 2018 - 2022, TURKEY

- Gained self-studying and problem-solving skills while working on Masters project.
- Learned to integrate into a working system in a short while, working at a material testing laboratory as an SEM device operator.

EDUCATION

BrainStation | Diploma, Software Engineering

APR 2023 - JUNE 2023, TORONTO, ON

Sherbrooke University | PhD in Mechanical Engineering

MAY 2022 - 2023, SHERBROOKE, QC

- NSERC, Governmental Scholarship

PROJECTS

Lead coder | BrainStation

JUNE 2023, CAPSTONE

- Developed a Backtracking Algorithm visualizer by coding a SUDOKU solver by using Backtracking Algorithm.
