PROFILE

I am a Web developer who graduated from BrainStation with a background in electrical engineering. Working above and beyond for all that I do is my motto and live that every day by always spending my time learning new technical skills. I have years of software development experience under my belt, including building multiple complex Python applications and building reactive websites with clean relational databases in MySQL.

EXPERIENCE

Food and Beverage Area Supervisor | Canada's Wonderland

AUG 2021 - PRESENT, VAUGHAN, ON

- Assisted operations team in reducing food cost by about 5-6% bi weekly through analysis of sales and customer satisfaction data.
- Exceeded sales forecast by 6-8% on a bi-weekly basis.

Food and Beverage Head Supervisor | Canada's Wonderland

APR 2018- 2020, VAUGHAN, ON

- Hired and trained 30+ services associates and motivated them to become hardworking team members with strong company knowledge.
- Assisted in increasing quarterly sales revenue by 8% each month for 2 years.

CANSAT Electronics Radio Project Lead | Ryerson University

JAN 2017 - 2018, TORONTO, ON

- Led the radio project team with a group of 15 engineering students to design, build and launch a miniature satellite that ended up passing the first two rounds to the finals in Texas.
