

AUSTIN WISDOM

SOFTWARE ENGINEER

EXPERIENCE

Content Production Manager | Speak

JUN 2021 - DEC 2022, SAN FRANCISCO, CA

- Coordinated contractors, voice actors, and team members using Notion, Slack, and Figma to ensure every milestone on the project roadmap was achieved across a three month project. Successfully produced an AI-powered language course while meeting every deadline.
- Demonstrated prompt-engineering skills using GPT-3 and 4 to create innovative language courses on the OpenAI playground.

Founder | La Vie Luxury Home Imports, LLC

APR 2020 - MAY 2021, BOCA RATON, FL

- Administered every facet of business operations, from product sourcing to building the company website, including trademark registration.
- Analyzed KPI's on Amazon's seller platform to grow sales revenue and establish the LVL brand name.

Founder | AusTinsina English Adventures

OCT 2017 - APR 2020, OURENSE, GALICIA, SPAIN

- Planned, shot, edited, and published educational English lessons using the YouTube platform and Adobe Premiere Pro.
- Built and managed a thriving community of international students, growing the channel to over 5,000 subscribers.

PROJECTS

AI Language Tutor Web App, Capstone Project | BrainStation

JUNE 2023

- Built an AI language tutor web application using OpenAI, React, React Router DOM, Node.js, and Express.
- Integrated OpenAI's GPT-4 language model to allow users endless, dynamic language practice.
- Used Knex and MySQL to create a relational database to store user information and information to dynamically render the language exercises.

Industry Partner Project for Microsoft | BrainStation

JUNE 2023

- Joined a 7-person team including UX/UI, Data Science, and Software Engineers in a 24-hour challenge to create integrated data security functionality for Microsoft's current browser applications.
- Our project simplifies data security management for users with little tech skills, allowing them to protect their own data, and their family's data.
