

Alberto Borgonovo

Software Engineer | Financial Analyst

EXPERIENCE

Wentwood Asset Management, Miami, FL

October 2022 – January 2023 Analyst

- Helped build out the operations of the business, including organizing and filing all transactions and creating processes and procedures for different aspects of the business
- Sourced deals to fund by researching and analyzing potential investments through marketing campaigns, conducting due diligence on borrowers and collateral, and negotiating terms and conditions with borrowers

Oceana Blue, Miami, FL

October 2021 – August 2022 Analyst

- Reviewed numerous reports dating back to 2005 from over 65 private funds and three investment vehicles with different ownership structures, and extracted and organized key data in Excel to facilitate data import into Addepar, a wealth management platform specializing in data analytics, aggregation, and portfolio reporting

StoneX (formerly INTL FCStone), Miami, FL

Summer 2019 Intern

- Analyzed daily spreads and yields for Puerto Rico and state issued general obligation (GO) bonds
- Participated in commodity (coffee, sugar, and electricity) trade calls with clients and confirmed and filled orders

uCast, Sydney, Australia

Summer 2018 Intern

- Researched the e-Sports market in Australia to understand demographic segments for targeted uCast advertising
- Attended meetings with potential target companies to evaluate acquisition and investment opportunities

Morgan Stanley Private Wealth Management, Miami, FL

Summer 2017 Intern

- Researched, analyzed, and organized mutual fund and hedge fund investment holding, asset allocation, and performance data for purposes of investment analysis and presentation to clients
- Researched and analyzed sovereign and corporate bond information and trading data for various issuers

PROJECTS

Lead coder | Think on it

MAR 2023, BrainStation

- Collaborated with UX/UI team to develop an app that uses emerging technologies to bring people-centric Human Capital Management offerings to the market
- Utilized JavaScript (JS), React, and a Text-to-Emotion API to analyze employee trends

Lead coder | Maze Runner

APR 2023, BrainStation

- Utilized React components, state management, and event handling to create an interactive gaming experience with different difficulty levels and collision detection, showcasing proficiency in JavaScript, React, and game development concepts

SKILLS

HTML, CSS, JavaScript, Microsoft Office, Addepar, Node, React, Express, MySQL, Agile Development, Document Object Models (DOM) APIs, Web APIs, User Authentication, OAuth, Heroku, GitHub, Jest

PROFILE

I have always been fascinated by technology and its potential to solve complex problems. Ever since I was young, I loved puzzles. At age 13 I learned to solve a Rubik's Cube and in high school I became very comfortable solving complex calculus problems. The idea of being able to create innovative solutions and continuously improve upon them in software engineering has always been a motivating factor for me. Additionally, I have realized that software engineering offers a dynamic and challenging career path, with endless opportunities for growth and development. I am excited by the prospect of constantly learning and developing my skills in order to stay at the forefront of the field.

EDUCATION

BrainStation | Diploma, Software Engineering

FEB 2023 - MAY 2023, Miami, FL

University of Miami | Bachelors in Economics, Minor Finance

JAN 2016 - 2020, Miami, FL
