PROFILE

Coming from the helping fields of Social Work and Education, I've noticed that technology lags behind in supporting us. I've taken the initiative to bridge these two worlds, and I've fallen in love with coding. Without hesitation, I'm eager to dive right in and start creating projects. My goal is to become a full-stack developer who integrates valuable skills from my previous careers, such as resilience, teamwork, and the passion for creating a better world through technology.

SKILLS

SQL (MySQL), Express, Passport, Node, Rest APIs, OAuth, JavaScript (React, Redux), MySQL, Agile Development, HTML, Document Object Model APIs, Web APIs, User Authentication CSS, SASS, Heroku, Jest, GIT, GitHub, Postman, Axios, Figma, Photoshop, Jira, Slack, Trello
