PROFILE

Throughout my career, from finance to the service industry and now to tech, I have been able to seize the professional opportunities that have presented themselves to me and adapt to be a high performer. Indeed, I took the opportunity to go and live in the United States, take on new jobs, learn new languages, and assimilate into a new culture.

My life journey thus far has taken me out of my comfort zone in my relentless search to find a career that will present constant opportunities for growth. As I have grown in maturity, self-confidence, and open-mindedness through my unique experiences, I am excited to develop within the ever-developing industry of technology and continue to improve my coding skills and learn new technologies.

SKILLS

HTML, CSS, JavaScript, Node, React, Express, MySQL, Agile Development, Document Object Model (DOM) APIs, Web APIs, User Authentication, OAuth, Heroku, GitHub, Jest

ACCOMPLISHMENTS

JUN 2008, UNIVERSITY OF NICE (IUT)

- Executed a report of 60 pages detailing the optimization of the management of a client portfolio in retail banking, followed by an oral presentation.

PROJECTS

BRAINSTATION PROJECT/NFG's, MAR 2023

- My team and I built an App page in a limited time frame (24 hours) called NFG's using API libraries, JavaScript, HTML, SASS, BEM.

BRAINSTATION INDUSTRY PROJECT/SPRK-E, MAY 2023

- As part of a 24-hour Hackathon for the UKG company, I collaborated with UX designers to create an app to help organizations become a Great Place to Work by building people-centric, Life-work Technology, using: React, Node.js, API provided by UKG, Sass, Figma, Canva, SQL,

BRAINSTATION CAPSTONE PROJECT/ OUI EAT, MAY 2023

- An application that helps users create shopping lists and provides a nutrition score for each ingredient. The app also suggests recipes based on the ingredients in the shopping list and allows users to share recipes and healthy eating tips to promote a healthier lifestyle. Leveraged various tools including React, Node.js and APIs.
