I am a results driven and detail oriented individual pursuing a career in Web Development. I believe that my ability to learn new concepts quickly, collaborate with other teams, and view problems through an analytical perspective have set me up for success as a Web Developer. I am enthusiastic about this field because I enjoy problem solving and finding solutions that exceed client expectations.

EXPERIENCE

Underwriting Intern | Aviva Canada

JUNE 2019 - AUG 2019, TORONTO, ON

- Accurately migrated 2000+ policies from the existing database to the newly adopted risk management software LC360.
- Identified and corrected crucial errors in the engineering inspection database.
- Efficiently completed all assigned projects 1 month ahead of deadline.
- Liaised with field inspectors and underwriters from offices across Canada to ensure data accuracy in the system and provided assistance to ensure a seamless software transition.

Marketing Intern | State Farm Insurance

MAY 2016 - AUG 2016, AURORA, ON

- Implemented a blended marketing campaign for auto, home and business insurance through social media and cold-calling.
- Drafted and iterated a telemarketing script that increased phone conversion rates by 40%.
- Accurately maintained a record of contacts, accounts and leads for insurance agents to follow up.
