SKILLS

Figma, Sketch, InVision, Principle, Illustrator, Photoshop, JavaScript, HTML, CSS, Python, SQL, Salesforce, BluePrism, Angular, Spring Framework

PROFILE

Coming from a background in Information Technology, I had the privilege of working as a Software Developer in the banking industry after graduating from university.

While working, I realized that I was drawn more towards the usability and visual components of products. I decided to make the switch to UX Design because I believe in creating engaging, compelling and user-friendly products.

I enjoy solving challenging problems using empathy and design thinking, ensuring that products developed are not only functional but also pleasurable to the end user.

EXPERIENCE

RPA Developer, Operations Analyst | RBC

SEPT 2019 - FEB 2020, ONTARIO, CA

- Liaised between managers and stakeholders to resolve medium to high complexity issues
- Demonstrated organization by collecting and synthesizing data from various stakeholders to inform feature implementation
