SKILLS

HTML5, CSS, Javascript, React, Sass, Node.js, Git, Express.js, Flexbox, Axios, Github, Passport, Material-ui.

PROFILE

I got into web development as I was looking for ways to fill the gaps in my old industry—construction—and realized I preferred building online homes much more than physical ones. I get excited at the concept of bringing an idea to life with code. I am a multi-passionate project and people manager and deadline-hitter.

EXPERIENCE

Founder | TorCam Group

FEB 2015- 2020, TORONTO, ON

- Delivered renovations of up to \$150,000 on time and on budget
- Created strategic construction plans, liaised with professional experts, applied for permits, and organized manual labourers
- Emphasized transparent communication practices with clients throughout the project to ensure satisfaction

Lead Project Manager | One-Time Restoration

JAN 2013 - 2015, TORONTO, ON

- Led trades team on \$100k+ projects
- Managed quotes for external contractors
- Reported regularly to company owners, and ensuring satisfactory client communication

BrainStation | Diploma Candidate, Web Development

AUG - OCT 2020, TORONTO, ON

PROJECTS

SafelyPaid | Lead coder

Oct, 17 2020 - Oct 25, 2020, Brainstation / Capstone

COVID has added multiple levels of complexity to selling used goods in online markets like Kijiji, Facebook and Craigslist. With SafelyPaid, you can pay for your new found gem from home, coordinate shipping, track your item, and know that your money won't be sent to the seller until and unless your package arrives Safely in your hands.

Adidas | Collaborative coding

Oct, 15 2020, Brainstation/ 24 Hour HACKATHON

"What digital solution can we use to support the future success of eCommerce in the apparel/ sporting goods industry?" In order to answer this question, a team of developers, data scientists, designers, and marketers built an app within 24 hours that measures and compares clothes in person and online via a mobile app.
