PROFILE

I am transitioning from a career in law enforcement into the field of UX Design.

My self-taught background in web development and graphic design is where I first became familiar with UX design. I was drawn to UX because it offers the opportunity to continuously grow while getting to work in a meaningful team environment.

I am eagerly anticipating transferring my skills in time management and my ability to communicate effectively into a UX role.

EXPERIENCE

Information Administrator | Government of Alberta Alberta Serious Incident Response Team

FEB 2017 - PRESENT, CALGARY, AB

- Collaborating with team members, ensuring proper collection and sharing of sensitive information during high-stress emergency calls
