PROFILE

I managed my own cafe in Seoul, which developed my ability to analyze data with a business-oriented mindset.

I became a developer after completing a six-month intensive digital master course at the Korea International Trade Association.

I have traveled to 30 countries, and my boundless curiosity will serve as the driving force behind the development of my data capabilities.

SKILLS

Python, R, SQL, Tableau, HTML, CSS, JavaScript, JQuery, QGIS

EXPERIENCE

Web Developer | Openmate

JUL 2022 - 2023, SEOUL, SOUTH KOREA

- Apply the publisher's CSS workpiece to make the interface look good on the screen. The Id and Class name are different from what development actually uses and the designer gave, but I adjusted it. I solved it by looking at the flow of the web working.
- Perform the tests and report necessary for the development process. I created and ran the units of the test and found a place where the problem occurs. And it contributed to making a better site by consulting with the product manager.

EDUCATION

BrainStation | Diploma, Data Science
