Deployment & Development Tools: Heroku, GitHub, WebPack

PROFILE

I started working in software in 1995 since then I've worked in many different roles like web developer, requirements analyst, web designer, tester.

I paused my career for a five-year period because I wanted to be engaged with my children, now I'm ready and excited to focus on it.

My goal is to work on improving people's wellbeing. Technology is playing an important part in that and I believe the future holds us many amazing and unthinkable possibilities of changing our lives.

Web Development Candidate Winter 2020

Renata Fachin

Requirements and Test Analyst, Web Designer, Web Developer

I started working in software in 1995, since then I've worked in many different roles like web developer, requirements analyst, web designer, tester. In the meanwhile, I got a nursing bachelor degree since I'm interested in how to improve people's health and wellbeing. I paused my career for five years because I wanted to be engaged with my children, now I'm ready and excited to focus on it.

Little Storytellers

Little Storyteller allows children to create digital books through photos, audio and text. They are able to record their own voices, take pictures and write stories to share with the world. Little Storytellers permits parents to view their children's stories before they are shared. Through the use of technology we are empowering children to share their perspective of the world!
