PROFILE

Since being exposed to Web Development through a couple of courses at FIU, I've wanted to work in the field of Web Development. I am on a mission to marry creativity and technical skills and believe a Web Developer role provides the perfect opportunity to do so. My work history entails IT support and Implementation experience in a SAAS environment, and in conjunction with my educational background in Information Technology, I've honed technical skills and knowledge that will benefit me in a Web Developer role. My creative nature also serves me well in such a field, as I enjoy creating, whether it's solutions or aesthetically pleasing websites and graphics.
