PROFILE

I am making my career transformation realizing my potential in the tech field. Having worked as a developer and in IT management, I could safely say that I feel home getting back to this role. I mainly worked in coding, debugging and testing, but I branched out into a management/supervisory role that required me to work directly with the IT team in an organization while still working with code on a regular basis. I am very interested in working in such a role that I find very interesting and rewarding at the same time.

SKILLS

JavaScript, React, Node, Express
MySQL, Agile Development,
HTML, CSS, SASS, Web APIs, REST
APIs

RELEVANT EXPERIENCE

Assistant Manager IT | FCDF – Family Counselling and Development Foundation

JUL 2013 – DEC 2019, SANA'A, YEMEN

- Built a development cycle tracking and testing system that helped speed up development & made collaboration between team members efficient.
- Provided support to the IT team & assumed the tasks of overseeing ongoing projects' progress.
- Improved productivity by enabling the team members, providing them with technical support, and recognizing their individual areas of interest and utilizing that towards increasing the efficiency of work.

Computer Programmer | SFD – Social Fund for Development

AUG 2010 – JULY 2013, SANA'A, YEMEN

- Translated program design into code and ensured it adhered the software requirements given.
- Optimized code to be more modular and up-to-date.
- Debugged code via code patches, reverse-engineering, or directly on the code itself when necessary.
- Deployed applications on local servers and tested them locally.

OTHER EXPERIENCE

Banking Advisor | RBC

OCT 2022 – APR 2023, TORONTO, ON

- Advised clients on their day-to-day banking needs and provided solutions within the scope of the bank's services.
