PROFILE

While spending a couple of years working in the science/research field, I was given the opportunity to help our lab owner plan a website and mobile app for scheduling covid-19 appointments. The experience led me to recognize that I desired a return to a more creative space, and I began pursuing UX Design. By combining the analytical approach of science with the creative skills from my past artistic projects, I became comfortable and skilled in the user experience field.

EDUCATION

BrainStation | New York, NY
Diploma, UX Design
JUN 2023 - SEP 2023

Coursera/GIT | Online
Certificate, Intro to UX Design
JUN 2022

Rutgers University
B.S. in Biology, Minor in Music
