PROFILE

I have chosen to pursue a career as a Software Engineer with the goal of facilitating a more sustainable work/life balance and a more reliable income source. I have found this industry combines my love of problem solving with the ability to work in a team-based environment.

I attended college for a degree in Film Direction where I was able to reaffirm my love of the medium. To that end, I am pursuing a position with a streaming service, or something similar, to combine my passion for both technology and filmography.

SKILLS

HTML 5, Cascading Style Sheets (CSS), React.js, Node.js, JavaScript, Express, MySQL, Web APIs, Agile Development, Document Object Model (DOM) APIs, User Authentication, OAuth, Heroku, GitHub, Jest
