PROFILE

Over 3 years working in the photography industry had truly opened my eyes and brought me valuable connections. However, I found that tech is fascinating as we are living in it, with it and are uploading our life on it. This is a huge and fast-growing industry that I want to dive into and understand it more. Having an art background and entering into tech would give myself this perfect balance of being creative and logical.

SKILLS

JavaScript, HTML/CSS, React,

Sass/BEM, DOM, Postman,

Axios, Node.js, Express,

MySQL, Git, Agile Principles,

Framer Motion, GSAP.
