PROFILE

I am a creative technologist with an all-round skillset in product design, business analysis, and software development. Thanks to one of the best managers I've ever had, I had the privilege of being given an opportunity to begin a career in tech within the banking industry. With my foundation rooted in code and my passion geared towards creative design, I strive to use my combined knowledge to build the best human-centered solutions.

SKILLS

Figma, UX Research, UX Design, UI Design, Sketching, Wireframing, Prototyping, Adobe Creative Suite (Photoshop, Illustrator, Premiere) HTML, CSS, Javascript, C#, SQL

EXPERIENCE

Software Developer | TD Bank

SEPT 2019 - SEPT 2023, TORONTO, ON

- Developed **front-end** facing apps in Microsoft Power Platform to provide digitized solutions for business stakeholders
- Drafted technical design documents and **presented** them to the solution review board to gauge the project's **feasibility**
- Worked with business stakeholders by understanding their requirements and iterating through constant **testing**
- Documented coding standards such as **design systems** to ensure consistency was maintained amongst developers
- Ensured all application interfaces upheld enterprise **UI standards** and passed **accessibility** guidelines

EDUCATION

BrainStation | Diploma, User Experience Design

JUN - SEP 2023, TORONTO, ON

OCAD University | Certificate, Digital Media Skills

JAN - AUG 2019, TORONTO, ON

University of Toronto | Bachelors of Arts

SEP 2014 - MAY 2019, TORONTO, ON

PROJECTS

UX Designer | Capstone Project

JUN - SEP 2023, BRAINSTATION

- Throughout the UX Design course, I continuously worked on a Capstone Project to create a solution for my chosen problem space of burnout in office workers by applying the UX Design concepts we learned unit-by-unit
- I designed an app called ShareLoad to provide a platform for burnt out office workers to help connect them with senior colleagues that are willing to help alleviate them of their heavy workload so they can have more free time

UX Designer | Industry Project

AUG - AUG 2023, BRAINSTATION

- Towards the end of the UX Design course, we were invited to participate in a 24-hour Hackathon sponsored by 7Shifts to tackle the problem space of shift management by collaborating with cross disciplines
- Our team of UX Designers, Software Engineers, and Data Scientists collaborated by narrowing our scope to what was feasible to build and collect data within 24 hours, and developed a solution based on creating incentives to reduce turnover to address the issue of shift management
