PROFILE

As a recent computer science graduate, I am a good candidate for a software developer role because of my strong educational background in computer science and software development. My academic projects have allowed me to develop problem-solving skills and learn software development best practices, making me a quick learner and a dedicated team player. I am eager to apply my knowledge and skills to real-world projects and contribute to the development of innovative software solutions.

SKILLS

C++, SQL, HTML, CSS, JavaScript, Node, React, Express, MySQL, Agile Development, Document Object Model (DOM) APIs, Web APIs, User Authentication, OAuth, Heroku, GitHub, Jest

EXPERIENCE

Sales & Communications | Wireless Wave

JUN 2022 - APR 2023, TORONTO, ON

- Consistently achieved sales targets and revenue growth by applying strong analytical and problem-solving skills to identify and address customer needs.
- Demonstrated a high level of adaptability and quick learning in staying updated with technological advancements.
- Utilized excellent communication and teamwork skills to foster collaborative environments and achieve successful outcomes.
- Demonstrated a strong work ethic, consistently meeting project milestones and delivering results within designated timeframes.

Delivery Driver | Fedex Express

JAN 2022 - APR 2023, TORONTO, ON

- Demonstrated strong time management and organizational skills, effectively prioritizing tasks and meeting delivery deadlines.
- Consistently met or exceeded productivity goals and service level agreements, ensuring customer satisfaction.
- Adapted to changes in delivery schedules and routes, demonstrating flexibility and adaptability to meet customer needs.
- Trained new team members on shipping procedures and software, contributing to the development of a knowledgeable and skilled team.

EDUCATION

BrainStation | Diploma, Software Engineering

APR 2023 - JUN 2023, TORONTO, ON

Seneca College | Diploma, Computer Programming

SEP 2019 - APR 2023, TORONTO, ON

PROJECTS

Industry Project x Microsoft | "Microsoft Account Hub"

MAY 2023 HACKATHON

- Collaborated with a team of six to create a solution addressing Microsoft's user data concerns and enhancing user awareness of the information they share.
- Received positive feedback and recognition from Microsoft representatives for the solution's potential to positively impact user privacy.

Lead Coder | "Weather App"

MAY 2023 HACKATHON

- Led a team of four in the development of a web application that provides current weather and five-day forecast for any city using HTML, CSS & Javascript.
- Designed and developed the backend using JavaScript, integrating it with the frontend developed by team members using HTML & CSS.
- Utilized Sass, Bootstrap, and APIs to optimize the application's performance and scalability.
