

HARSHMANDEEP ARORA

SOFTWARE DEVELOPER

EXPERIENCE

Junior Web Developer | Co Pioneer

APR 2022- SEP 2022, TEXAS

- Attained proficiency in HTML,CSS and javascript, completing assigned tasks with accuracy and efficiency.
- Completed assigned projects on time and demonstrated the ability to work independently and as a part of team
- Demonstrated problem-solving skills by troubleshooting and resolving coding errors, contributing to the overall quality of the website.
- Exhibited strong attention to detail, ensuring that all website components were properly aligned and responsive across different devices.

EDUCATION

BrainStation | Diploma, Software Engineering

APR 2023 - JUNE 2023, TORONTO, ON

Niagara College | Mechanical and Welding Techniques

JAN 2017 - APR 2018, NIAGARA FALLS , ON,

PROJECTS

Project HATH

MAY 2023 PEER PROGRAMING HACKATHON

In June 2023, during a hackathon, my team and I developed HATH, a React and Node.js web app for coding bootcamp students. HATH facilitates peer connections and offers LeetCode JavaScript challenges to improve skills. Notably, our app emphasizes pseudo-code development before writing code, promoting good coding practices. This project enhanced my full-stack development skills and provided insights into the challenges faced by aspiring software developers.

Project Yard Management System

JUNE 2023 CAPSTONE PROJECT

Developed a full-stack web application to optimize the management of materials and equipment in a manufacturing facility. The system is built using a robust tech stack that includes TypeScript,Node.js, Express, MySQL, and React. The application offers features such as user authentication, comprehensive tracking of materials, efficient location assignment within the yard, and an issuance log for monitoring material usage. This project serves as a testament to my ability to deliver complex solutions under tight deadlines, demonstrating my proficiency in full-stack web development, database design, and the integration of Internet of Things (IoT) systems.
