Combined major in Business and
Computer Science

ABOUT ME

I am passionate about solving real-world problems to make people happier and our lives easier. Through my background in commerce and front-end development, I found an opportunity in UX design. An opportunity to achieve my life goals while pursuing my passion. I am eager to use my empathy, creativity and technical background to change the world one step at a time.

EXPERIENCE

Front End Developer | Eight Solution Inc.

JAN - MAY 2019, VANCOUVER, BC

- Reduced platform speed performance bottleneck by 30% and improved the readability of the existing code
- Collaborated with the UI team and implemented new features based off the prototypes
- Spearheaded the Cypress automation testing framework project, lessening the time spent on smoke testing by 80%

Web Developer | Weltel Inc.

SEP - DEC 2018, VANCOUVER, BC

- Collaborated with researchers and patients to design and implement new patient rehabilitation features
- Revamped the user interface and interactions to make the application cross-device compatible and support multiple languages

Junior User Research | Ipsos

MAY - AUG 2018, SHANGHAI, CHINA

- Identified user pain points by extracting key insights from quantitative and qualitative data under various business contexts
- Met clients need by preparing visual presentations of my key findings for multiple teams
