## ABOUT ME

Innovation, efficiency and growth are areas I strive to improve upon in all facets of life. I am a Chartered Accountant and was formerly employed as a Manager, Finance in the Healthcare sector. While my career path was in Finance, technology has been, and always will be, my passion. The power that technology enables in its various forms is incredibly fascinating to me. After a career in Finance I have decided to transition into the field of Web Development to pursue my passion for technology. I am especially drawn to the aspect of this discipline that combines both creativity and problem solving. I believe my attention to detail and analytical mindset will allow me to thrive in a Web Developer role.
