linkedin.com/in/kevin-kimmer

A biochemist by education and web developer through passion and skill. I studied the natural sciences to satisfy my desire to understand the mechanics that govern the physical world, but this did not translate into a career path I wanted to pursue. My earliest memories with my father in Canada were building our home computers to play games together. That was truly the moment when my fascination with technology and computers began. I have always harbored that fascination and decided to transit into the field I was truly passionate about.

## EXPERIENCE

---

### Bartender | Beachhouse Restaurant

November 2019 - 2020, West Vancouver, BC

- Ability to work in a fast-paced environment where attention to detail and time management is essential
