PROFILE

I am passionate about software because it is the building block with which all tech is created. I decided to pursue education in software development because of my work in fintech and my desire to be able to build products with my own hands and the need to know exactly how my team was doing it. My experience in fintech and blockchain technology will be a great asset for any company as the future of finance is on the blockchain.

SKILLS
Javascript.
React.
Node.
SQL.
Japanese, Pashto, Farsi, Arabic, Hindi, Punjabi.

EDUCATION

BrainStation | Diploma, Software Engineering
SEP 2023 - DEC 2023, VANCOUVER, BC

Douglas College | Diploma in Philosophy
JAN 2020 -JUN 2023, VANCOUVER, BC
Honor Roll.
Dean's List.

EXPERIENCE

Director of Finance and Operations | Bucky Technologies
MAR 2022 -Sept 2022, Vancouver, BC

- Built a system for NFT rarity permutations dividing 8000 NFTs into 6 tiers, allowing us to build and commission our artwork around this mathematical model
- Researched which network would be best for minting, taking into account factors such as gas price and speed of the blockchain, which allowed us to maximize efficiency and reduce overhead costs
- Managed marketing and social media teams posting on facebook, instagram, and twitter, as well as creating a discord server for community engagement, allowing us to build a community of thousands without any money spent on ads
- Prepared and managed records for both taxes and payroll and wrote applications for grants and tax credits/incentives saving tens of thousands of dollars

Chief Revenue Officer | Carmodity/Econommi
JUN 2021 - 2022, Vancouver, BC

- Built a network of hundreds of contacts in Fintech through Linkedin and networking events- some of which we hosted.
- We developed a system of lending/leasing that allows for individuals to invest in a decentralized ETF which we call a "LeaseToken". Our LeaseToken is now TFSA eligible. The tech stack was React, Node.js and PostgreSQL for our database.
- Raised 250k for our pre-seed round through accredited investors, with over 20 investors who have continued to invest more into the company each year.
- Hit the target of 30% MoM growth- the metric that correlates most with tech-startup survival.
- The company is currently evaluated at 10 million, having grown from an evaluation of 300k at the start of 2021.

PROJECTS

Coder | https://www.getzenshop.com/

Coder | Brainflix Project

Coder | Shopify Hackathon
