Figma, Adobe Suite, Microsoft Office

### LANGUAGES

Haitian-Creole

### PROFILE

Building a skillset in UX/UI allows for the merging of a people-centered environment with direct problem solving. I seek to utilize my communication strategies and social sciences background to maximize innovative practices for today's world. Contributing to the communities I have worked with in the past, while diversifying the populations I serve motivates me, as it brings me closer to utilizing my empathy working with a wider range of companies and organizations.
