PROFILE

After many years focusing on artistic design ranging from 3D modeling and animation to commercial art and product design, I have transitioned into Web Development. Coding is at the core of building innovative and visually appealing products which led me to learn languages and frameworks, gain hands-on experience in building full-stack web applications, and design responsive user interfaces. I am eager to contribute my creative talents to a dynamic software engineering team and continue building cutting-edge applications.

SKILLS

Design:

Photoshop, Illustrator, After Effects, Animate, InDesign, Maya, Figma.

Web Development:

HTML/CSS, SASS, JavaScript, React, Node.JS, Express, MySQL, Agile Development, (DOM) APIs, Web APIs, User Authentication.

PROJECTS

Designer and Coder | FetchFind

MAY 2023, Personal Project

- Developed a dog adoption website using SASS, React, and the PetFinder API which allows users to apply for the adoption of adoptable dogs in the SoFlo area.

Full-Stack Developer | UKG Industry Project

APR 2023, Industry Project

- Created and developed the winning solution implemented by my team of 6, in a project held by a panel of judges consisting of high-level tech professionals at UKG. Their feedback, including the quote "one of those things that is so simple and effective, it makes you go 'wow why don't we have this already?'" was both humbling and gratifying, and I am honored to have been a part of such a successful team.

Lead Designer & Front-End Lead | 2Ye Clothing Brand

MAR 2023, BrainStation Hackathon 1

- Designed and coded a Mobile/Desktop responsive site in under 6 hours.
- While we were awarded 2nd place based on an applause-based system, the event organizers personally expressed their admiration for our project as 1st place worthy.
