## PROFILE

I am an experienced Information Management professional seeking new challenges. In my career so far I have been happiest when working with technology to reimagine the possible, and I have found that Software Engineering presents the opportunity to do this every day. My background has trained me to know what my resources are and how to use them, which complements my curiosity and love of learning. I'm excited to enter an industry where I can be a life-long student.

## SKILLS

HTML, CSS, SASS, Tailwind, JavaScript, React, Node, Express, Knex, SQL, MySQL, PostgreSQL, DOM APIs, Web APIs, OAuth, User Authentication, Python, Excel, Agile Development, Figma, Docker, GitHub

## EXPERIENCE

---

### Records & Information Management Specialist | PwC

SEPT 2012 - PRESENT, VANCOUVER, BC

- Consults with teams in all lines of service nation-wide, presenting an Information Management perspective to diverse audiences and listening with empathy to understand how to best support teams
- Composes instructions on Records Management procedures and best practices; delivers training on software use
- Responsible for Records Management technology requirements including database maintenance, data analysis, building an internal portal, and sourcing and testing software
- Reliably demonstrates organizational abilities and attention to detail by independently providing deliverables for projects involving data cleansing, analysis, and presentation. Takes ownership of work and welcomes constructive feedback

### E-Library Assistant | Ontario Genealogical Society

MAY - AUG 2009 - 2012, TORONTO, ON

- Took a leadership role in a small team working on the development of an e-library of heritage documents
- Quickly gained proficiency using different types of digitizing equipment, editing software, and library databases
