

# YASH NAGPAUL

## WEB DEVELOPER

### EXPERIENCE

#### Operations Support (Co-op) | Global Container Terminals

JAN 2019 - AUG 2019, VANCOUVER, BC

- Coordinated import operations and export hazardous shipments for an average of four vessels per week at Canada's largest container terminal.
- Worked within tight daily deadlines and provided unique solutions to our customers while establishing long-term relationships.

#### Volunteer Mentor | Junior Achievement of British Columbia

JUL 2019 - JUN 2020, VANCOUVER, BC

- Helped students explore how business are created and what makes them thrive
- Used games and multimedia to teach students about financial literacy, innovation, start-ups, and entrepreneurship
- Designed and led the execution of local marketing initiatives by working closely with Marketing and Sales teams.

#### Income Tax Assessor (Co-op) | Canada Revenue Agency

SEP 2017 - DEC 2017, SURREY, BC

- Handled confidential information securely while corresponding with taxpayers and their representatives

### SKILLS

HTML5, CSS, DOM APIs, React, Node.js, Express.js, Web APIs, User Authentication, OAuth, MySQL, Jest, Enzyme, Heroku, Github, WebPack

### PROFILE

From writing my first Logo commands in grade 3 to writing MySQL statements and Java programs in grade 12, computer science had been one of my strengths. Then life happened, we moved to Canada. I studied what I could, based on the prerequisite requirements of Canadian universities. I took up jobs in distinct fields. My fondness of software may have gotten sidelined, but by no means diminished. Finally, a few years later, I decided to grind for a few months and re-learn enough programming to get my first job as a developer. By hiring me, you will be hiring someone who knows there is a lot more to learn. And, you will be hiring someone who is just fond of learning and, of course, writing code.
