PROFILE

Found my passion in website development whilst trying to create a personal site for my tutoring service and immediately recognized the absolute unlimited possibilities with development, which confirmed my decision to commit towards this career path and to be part of this ever-changing technological world. As the tech field is constantly changing, my ability to adapt as a visual learner proves to be an essence. Furthermore, the Math degree adds a substantial value to my logical thinking and analytical reasoning, thus problem-solving skills.

SKILLS

HTML5, CSS3, JavaScript, SASS, REACT, Node.js, Express.js, Knex.js, MySQL, Git, Python.

EDUCATION

BrainStation | Diploma Candidate, Web Development

JAN 2022 - APR 2022, BRITISH
COLUMBIA, CA

Simon Fraser University | Bachelors in Applied Mathematics

SEP 2015 - AUG 2020, BRITISH
COLUMBIA, CA

EXPERIENCE

Private Math Tutor | Self-employed

JAN 2021 - Present, Burnaby, BC

- Helped over 50 students overcome online classes and hooked to Mathematics via concise 1 on 1 guidance
- Utilized online platform to teach effectively and efficiently for 1 hour, thus creating an enjoyable atmosphere and lifting their fear of online classes
- Listened, analyzed high school and college student's struggle to bring them back on track and raised their GPA by at least 20%

Teaching Assistant | LSTS

SEP 2012 - APR 2015, Ho Chi Minh City, Vietnam-

- Became a trusted teaching assistant for accommodating and motivating roughly 6 below average peers in class who eventually passed with flying colors
- Nominated as class leader for 3 years and helped pushing class average steadily by over 30%
- Hosting Physics, Mathematics workshop for advanced learners in group of 5 to prepare for provincial competition

PROJECTS

FULLSTACK DEVELOPER | TRUE VALUE CARS

PRESENT, CAPSTONE

- Created a website for car's buyers, potential car's buyers to share recent purchases and lookup recent car sales to obtain better insight towards a specific vehicle in this unstable, bubble market
- Utilizing REACT, Node, Express to develop well-maintained server in the backend and smooth frontend functionality

FRONT-BACKEND DEVELOPER | INSTOCK

MAR 2022, GROUP PROJECT

- Developed front and back end for an InStock project that allows user to interact with an existing set of warehouses and their inventories
- Assured details in the project meet requirements in Jira tickets to allow optimal project workflow

BACKEND DEVELOPER | ETHEREAL ANIMALS

MAR 2022, MINI-HACKATHON

- Designed and implemented a small app in 5 hours with 2 others teammates to randomize an animal with picture and funny description
- Took part in generating backend server fetching data to the frontend

LEAD CODER/DEBUGGER | MOVIE SEARCH

FEB 2022, MINI-HACKATHON

- Created an application in less than 24 hours that provides movie search according to genre and language using TMDB api
- Effectively coded and debugged in a timely fashion for optimal visual appeal and performance
