PROJECTS

Software engineer | CAP Stone
MAY 2023, BRAINSTATION

- Created a modernized dating web-app that focuses on creating a genuine connection. Libraries used are React.js, Node.js, Knex query builder, and MySQL.

Industry Project (UKG) | Software Engineer
MAY 2023, BRAINSTATION

- Collaborated with the UX/UI team by helping nurses schedule time off to better care of themselves using AI provided by UKG.

Software engineer | Hackathon
MAR 2023, BRAINSTATION

- Used a weather API to demonstrate weather conditions on Mars and comparing them to weather conditions in Miami.

Software engineer | InStock
APR 2023, BRAINSTATION

- Collaborated with other software engineers to create multi-route e-commerce responsive website.

Software engineer | BrainFlix
APR 2023, BRAINSTATION

- Used React.js, built an API to obtain data and showcase on the front-end via Axios calls.

Software engineer | BandSite
APR 2023, BRAINSTATION

- Multi-page website that uses API back-end to retrieve data.

Software engineer | Travel Site
MAR 2023, BRAINSTATION

- Created a multi-page static travel website using HTML/CSS. Initialized use of GitHub.

EXPERIENCE

ER Registered Nurse | Aya Healthcare
FEB 2021 - DEC 2022, SAN DIEGO, CA

- Provided critical care to COVID-19 patients in rural hospitals.
- Demonstrated exceptional empathy, professionalism, and attention to detail while maintaining patient privacy and dignity.
- Managed high-stress situations with professionalism and composure.
- Collaborated with interdisciplinary teams to continuously improve nursing practices and enhance patient outcomes.
- Proficient in various electronic medical records systems and highly adaptable to new technologies.

ER Registered Nurse | Orlando Health
OCT 2018 - FEB 2021, ORLANDO, FL

- Effectively prioritized and triaged patients in a fast-paced environment.
- Educated patients and their families on disease management and prevention.
- Maintained accurate documentation and ensured compliance with regulatory standards.

PROFILE

As a registered nurse with a deep passion for helping others, I am transitioning to a career as a software engineer to combine my personal values of integrity, teamwork, and dependability with my interest in technology. Through my experience as a nurse, I have developed critical thinking, communication, and problem-solving skills that have been invaluable in my journey as a software engineer. I am driven by my desire to make a positive impact on people's lives through technology, and my ability to learn quickly and make informed decisions under pressure allows me to do so effectively. I am excited to continue leveraging my skills and expertise to create innovative solutions that improve the lives of others.

SKILLS

HTML/CSS, JavaScript, VS Code, Slack, GitHub, Sass, React, Node, MySQL, Python, Figma, DOM APIs, Web APIs, User Authentication, OAuth, Heroku, Jest, Agile Development
