## ABOUT ME

After exploring the Banking and Professional Services industries, my interest in human behaviour and thirst for knowledge has pulled me towards the Data Science field.

I am seeking opportunities as a Data Scientist where I can use my technical skills to assist in making data-informed decisions to drive financial growth.

## WORK EXPERIENCE

---

### Analyst, Quality & Risk | Deloitte Canada

JULY 2019 - PRESENT, TORONTO, ON

- Managed firm identified risks by advising partners and professional staff that their personal investment accounts adhere to firm policies
- Collaborated with stakeholders to resolve data import issues and anomalies identified by the firm's risk monitoring system
- Learned about the Canadian and international investment marketplaces
- Conducted research on new investment products, as required

### Account Services Agent | RBC

FEB 2019 - JULY 2019, TORONTO, ON

- Collaborated cross functionally with various stakeholders to manage business account holders' transactions
- Oversaw special transactions from personal deposit accounts across Canada
- Discovered fraudulent activity within business accounts and devised a plan with account managers to mitigate fraud risk

## EDUCATION

---

### BrainStation | Diploma Candidate, Data Science

SEPT- DEC 2020, TORONTO, ON

### BrainStation | Certificate, Data Analytics

APR - MAY 2020, TORONTO, ON

### University of Waterloo | Bachelor of Mathematics

2013- 2018, WATERLOO, ON  
Honours Mathematics and Business

## PROJECTS

---

### Predicting Song Similarities | Data Scientist

OCT - DEC 2020, TORONTO, ON

Implemented unsupervised learning models to predict if songs were sonically similar

## SKILLS

---

MySQL, Python, R, Pandas, Numpy, Matplotlib, Pillow, Librosa, Pydub, Scikit Learn, PyTorch, TensorFlow, Neural Networks, AWS/Cloud Computing
